This revised edition of the Provisional Dictionary has been up-dated to correspond to the symbol vocabularies and stamps printed by the Blissymbolics Communication Foundation in December 1975. It has been compiled to meet a need expressed by teachers currently using Blissymbols in their instructional programme. It is by no means to be considered a complete or comprehensive dictionary of Blissymbols but only as a provisional one designed as a temporary stop-gap measure until a formal version is compiled and published.

The format of the dictionary remains that of the first edition, compiled by Oliver Mott, September 1974.

The symbols as reproduced are taken from several generations of displays and supplementary stamps and are not to be used as a guide to the drawing of symbols.

July 1976

PREFACE TO THE PROVISIONAL DICTIONARY, Revised Edition

The symbols used in the Blissymbolics Communication Foundation vocabularies are of four types:

Simple pictographs depicting concrete terms, e.g.  house,
 animal.

Arbitrary symbols (with no representational connection between symbol and concept), e.g.  question,  the, + and.

Abstract representational symbols, indicating relational concepts, e.g. | after, | before, v on.

AND

Compound ideographs representing objects or concepts by combinations of other symbols, e.g.  late,  school.

(house-give-knowledge)

The purpose of this word-to-symbol Provisional Dictionary is to list and locate all the symbols that appear on the Blissymbolics Communication Foundation displays and optional supplementary stamps issued in December 1975, and to give a breakdown of the compound symbols.

The composition of the compound symbols is exposed only in terms of the parts which make them up, and a more detailed explanation or interpretation of the symbol is not given. The dictionary does not necessarily show how each symbol should be explained to a child learning the system.

It may help to give an explanation for three particular symbols which occur in a number of compounds in an idiomatic sense:

 basic meaning, heart, also represents feeling, emotion, in such symbols as  happy,  angry,  upset,  feel,
 to love,  to want.

 basic meaning, roof (cf.  house), is extended to mean protection, safety (as in  shoes,  safe,  policeman), and is also the element indicating family relationships: e.g.  father,

PREFACE CONTINUED

 family,  brother, etc., and  to marry.

— basic meaning earth, occurs with eye in  colour with ear
in 2 sound,  loud, with mouth in  food, and with plus
in  to have.

KEY TO DICTIONARY

Reading left to right, the letters and numbers indicate:

- ⓑ The Blissymbolics Communication Foundation version of a symbol and/or explanation. For the C. K. Bliss version see Appendix A.
- ⓑ The Blissymbolics Communication Foundation version of a symbol and/or explanation; subject to further review.

1 100 vocabulary, dated December 1975

2 200 vocabulary, dated December 1975

4 400 vocabulary, dated December 1975

s optional supplementary stamps, dated December 1975

Next, the word is given which appears beneath the symbol on the December 1975 vocabularies or stamps.

A word which is bracketed does not occur on any of the displays, but the symbol associated with it is a basic element, as part of other compound symbols.

The symbol follows;

next, where appropriate, the designations A. (adjective), and V. (verb);

finally, the words indicating the composition of a compound symbol.
